

IBRAHIM HASHME

Experience

Proats

Founder, Sales+Manufacturing

Feb 2016 to Jan 2017

- Built prototype day-pack dispenser which mixed powders according to the inputted nutrition profile
- Acquired ~45 customers who bought 7 day pouches weekly, according to their needs
- Hired 2 students to mix powders and keep up with demand
- Sold ~4,000 day pouches over the course of a year

Terrapin Works

Product Designer/Engineer

Dec 2016 to Aug 2017

- Designed mouse cage vent plenum for injection molding with overmolding process; performed airflow, structural, and manufacturability analysis
- Wrote control system for robotic arm for use in engineering design course
- Designed+printed housing for UV curing oven in polycarbonate on Fortus 400MC; fabricated+implemented circuitry & electronics
- Designed+implemented rotational locking mechanism for ducting fans on wall climbing car

Collider

Director, Cofounder

Sep 2015 to Jan 2017

- Acquired \$20k of hardware and tools, ran day to day operations
- Mentored teams with ongoing projects in the space
- Led team of designers, artists and engineers to renovate/rebrand the makerspace entirely

Terrapin Hackers

President Hardware

Sep 2013 to May 2016

- 1,800 student hacker collective
- Acquired funding, led core organizer cabinet
- Ran several introductory workshops on circuits and electronics
- School placed 1st on MLH rankings; and placed consistently since

Projects

Makerspace Rebrand/Renovation

Project Manager

- Put together and led 6 person design team and 15 person execution team
- Described vision to design team, worked with them to come up with new brand+look
- Set up/ran regular meetings with key stakeholders; as well as involved teams
- Wrote+presented proposals; ran negotiations between stakeholders

Routinegen

Product Manager

- Dynamic training routine generation depending on user's goals
- Brought designer, developer, and strength coach on board
- Iterated through designs with designers and routines with coach
- Worked on actual development with developer

Hairy

Designer, Developer

- Crowd-sourced haircut suggestions for myself
- Built webapp allowing users to draw hair on my head, and save suggestions to imgur
- ~100 haircuts aggregated, ~500 pageviews with a 4 min average session duration

VRoom VRoom

Hardware

- Remote control sparkcore powered car to navigate maze
- Streamed to VR headset, controlled by hand gestures (myo armband)
- Won Best Hardware Hack (HoyaHacks 2016)
